

The only state-wide game programming competition in Oregon

It's a Project

The OGPC season runs from the release of the theme in November to the final event in the spring.

It's a Challenge

Students must design, develop, and test a complete playable game in only a few months.

We Help Them Succeed

We spend months planning, mentoring, and helping students and coaches to be successful.

Help us succeed

Our success depends on our sponsors and volunteers.

To:

Oregon Game Project Challenge

OGPC is a program that uses game development as a means of engaging students in various STEAM disciplines while having loads of fun. OGPC uses games as the medium to bring it all together.

- Science
- Technology
- Engineering
- Art & Design
- Math

Oregon's future

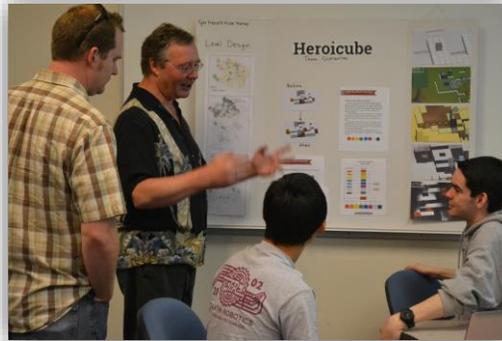

OGPC students have interests such as coding, art, audio, writing, and design. These skills are essential to keeping competitive in the global marketplace. These kids will be the STEAM workforce in a few years!

Sponsor OGPC

We are always looking for partners to support us with money, in-kind donations, or items to use as prizes. If your company has programs that fit with our needs, consider making them aware of us!

Why OGPC?

OGPC teams create games designed to be fun, challenging, and innovative. Teams present their games to industry professionals and can receive awards.

Teamwork gets it done!

OGPC participants learn to bring together their unique talents to create something more amazing than they could have developed individually.

"I think the encouragement of teamwork is great!" — Participant from 2015

How do students benefit?

- Work with teammates on a fun, creative project
- Develop a game for others to play
- See a plan go from concept to reality!
- Win recognition and awards

Join us!

Start a team in your area, mentor an existing team, or volunteer at our main event!
